ABOUT TRACK

Automobiles are integral part of our daily life. The Design of an automobile has a strongly influence on ease in manufacturing and its functioning. Noise, vibration and harshness control are the areas of focus for researchers. An exclusive Track on ***Automobile Engineering*** is being organized in the INTERNATIONAL CONFERENCE ON INNOVATIVE TECHNOLOGIES IN MECHANICAL ENGINEERING (ITME- 2019). This Track provides an international forum for presentation of recent developments/innovations on design and manufacturing aspects in automobile industries. Scientists and researchers working in the broad areas of Automobile Engineering are invited to exchange their ideas/results on the related research fields.

The scope of the track on ***Automobile Engineering*** includes the following, but is not limited to:

- Automobile design and manufacturing
- Noise, vibration and harshness control
- Vehicle safety and pollution
