## Humanities' Oracle

Dear Readers, few days back I had read a story on '**Self Worth**', and I am sharing this with you, I hope you will enjoy it. A very famous motivation speaker starts his speech by holding up a one lakh rupees bill and asking a question to the crowd if anyone would like to take this one lakh rupees. All the people raise their hands up. He then says that he would give this one lakh rupees to one of them but first he will crumple this cheque up. By saying this, he crushes that bill, drops that bill on the ground and stomps on it with his shoes. He then picks it up and shows that crumpled and dirty bill to the crowd. "**Who still wants to take it?**" All the hands were still up. "**Friends**" he speaks, I have just showed you a very important lesson of life. No matter what I did to this bill, everyone still wants to take this because it did not decrease in its worth. At times in our lives, our life collapses us, we take wrong decisions or go through dire circumstances, and start feeling worthless. Such situations come in our life to make us strong. No matter what you have gone through or what you will go through, you will never lose your worth because You are special – Don't ever forget it! So KIETians, your values may examine your personality for the pursuit of excellence and the significance of resilience. By doing so, you can build a bridge between your dream world and the world of reality, fostering a deeper connection and leaving an enduring impression.
