## &lt;&lt; YOUNG FACULTY SPEAKS &gt;&gt;

Strive for excellence rather than perfection.

By: Ms. Sudesh Pathania Assistant Professor, HS Dept

It is said that knowing yourself is the beginning of all wisdom. We will have to believe that we can't be on top of things all the time. Don't fret when you don't perform well, don't hyperventilate when you make a mistake or miss a deadline. To identify the root cause, it is important that you introspect and work on self-awareness. This needs time and a peaceful environment. Once you have identified the root cause of the issue, you can start to take small actions to make yourself feel better. I found myself fortunate enough to be a part of **KIET Group of Institutions- Delhi-NCR** such an organization where the objective is to strive for excellence rather than perfection. At the end I would conclude myself by saying that even if you want to compete, compete with yourself. Ask yourself, "Am I a better version of myself today" or "Am I doing better than I was doing before"?

Wish you all luck in your pursuit to achieve never ending peace and happiness!
