DEPARTMENT OF COMPUTER SCIENCE

Introducing an interaction mapped with innovation, the Department of Computer Science hosted an official interaction from April 27, 2023 to April 29, 2023, where the intent was objected towards administering the exploration of the ideas generated by the students who portrayed dedication towards resolving realistic problems.

The presentations prepared by students from the various sections of second year were displayed afore the student body which analyzed the projects as a jury who could observe, evaluate and screen them, in accordance with their competence.

Section "C" was slated to host an exhibition on the first day of the show. Section 'A' was set for an exhibition on the second day, while Section 'B' was scheduled for an exhibition on the third day. Where the sections, 'A' and 'C' saw a tough competition of strong ideas which collided to sieve the best four of both, section 'B' showcased seven innovative ideas which got shortlisted with no second thoughts being put to the decision making.

The dignitaries of the department also went through the projects on display, marking the event with a token of honor to have witnessed their esteemed feedback.

When asked about their experience, the participants as well as the student body of the jury talked of the coherently channeled conduct of the networked communication which dealt with the direction of technology towards a uniform command of precision, following valuable feedback from the seniors to their juniors.
