

Brief Report - International Internship 2018

International Internships are a great way for students to team up with students and teachers from all around the globe. There are multiple opportunities which lie ahead for our students the likes of benefiting students with future career opportunities by providing more life experiences and personal connections, complementing and accelerating fluency in speaking, reading, and writing foreign languages. Another benefit of studying overseas is the new perspective that students are given on their subject, allowing them to look at an academic area from a previously unseen angle. The resulting knowledge is likely to work to give them a much wider understanding of, and appreciation for, their particular area of interest.

The institute has had 3 student who participate in internship abroad, in academic session 2017-18. The students are from various branches of the college, participating in internships of their choice and interest. These students returned with immense experience relating to, not only, academics but also real life practices. There are 5 students who have been for internship abroad in the summer of 2018:
