## **Indo-UK led Curriculum Development Through Sustainable Materials and Manufacturing for the Future**

The world population continues to rise beyond seven billion and depletion of natural resources has continued to remain a formidable problem. Until now, the work in the area for industrial scale development of sustainable bio-renewable materials for biomedical, and automotive/building applications is still in infancy and timely opportunity exist in this arena both for the UK and India. However, both countries lack industrially oriented and research innovation led educational curriculum to train their engineering students. Especially in India, according to the All India Council for Technical Education more than 60% of the eight lakh engineers graduating from institutions across the country every year remain unemployed

([http://timesofindia.indiatimes.com/articleshow/57698133.cms?utm\\_source=contentofinterest&utm\\_medium=txt&utm\\_campaign=cppst](http://timesofindia.indiatimes.com/articleshow/57698133.cms?utm_source=contentofinterest&utm_medium=txt&utm_campaign=cppst)) Hence the goal of this project is to:

- 1) Enhance the student's exposure, at an early stage, to interdisciplinary and whole-system's approaches to studies of interdisciplinary science and engineering systems
- 2) Develop research and innovation led rigorous curriculum offering versatile employability skills via strong interdisciplinary engineering led learning well informed both by the industry and academia both from the UK and India
- 3) Formulate and supervise joint research projects (at UG and PG level) between UK and Indian partners directly steered by the industrial challenges
- 4) Disseminate the gained knowledge to the nearby Engineering institutes like Shiv Nadar University, ABES Engineering college, GB Pant University and offer e-learning courses through hub spoke model. The above goals will be achieved by academic partners of Cranfield University (working on advanced Ultra-Precision material oriented manufacturing; cutting-edge simulations; nanocomposites; and sustainable functional materials for aerospace; automotive and biomedical), their industrial partners namely Micromaterials Limited (a world leading company in nanomaterials characterisation) and Energy4U, UK (a world leading company specialised in making supreme quality engineering products for a wide variety of engineering applications ranging from biomaterial, solar and electronics). This grant application will be led by KIET and Industry from India .

Dear Sir/Madam,

Greetings from IIT Bombay!

*Dear CA I  
to take up the  
pl. discuss  
Oca J  
29/6/17*

As you are aware, there is a critical need to train teachers in effective of Information and Communication Technologies (ICT) in education and in the online blended/hybrid teaching-learning process. To meet this urgent requirement, IIT Bombay has designed Faculty Development Program (FDP), which has been approved by All India Council for Technical Education (AICTE). In our first FDP initiative, we offered a single Four-week long programme, which was attended by about 4000 teachers, of which 2193 qualified.

We are glad to announce that under the aegis of Pandit Madan Mohan Malviya National Mission for Teachers and Teaching (PMMNMTT), MHRD, GoI, we will be conducting two separate FDPs which are as follows:

(i) Foundation Program in ICT for Education: (20 July - 24 August) Two Week equivalent course.

(ii) Pedagogy for Online and Blended Teaching-Learning Process: 14 September- 12 October): Two- week equivalent course.

*→ Workshop Coordinator - Mr. Mrinal Verma*

These FDPs will be offered one after the other, and in order to register for the second course, the participants need to successfully complete the first one.

Funding support from Ministry of Human Resource Development (MHRD) permits us to offer these FDPs without any course fees. Participants have to take care of their expenses for travel/food during the A-VIEW interaction at Remote centers FDP. The cost of facilities provided at remote centres (RCs) will be met by IIT Bombay. This rate will be Rs. 1000/ participant for the 3 weekends as suggested during the orientation workshop of the previous edition of the FDP.

Your Institute has provided us valuable support in the past, to conduct T10KT training workshops. We request you to approve participation of your RC in conduct of this FDP. This will require your A-View facilities to be made available for face-to-face component during the weekend. A computer lab with internet connectivity will also be needed for tutorial/lab sessions during these days.

- FDP 1: A-VIEW Interaction: 19, 20 August 2017

- FDP 2: A-VIEW interaction: 23,24 Sept. and 07 & 08 October 2017.

Should you decide to participate, we request you to urgently nominate a Workshop Coordinator (WSC). The WSC can be any teaching faculty from your Institute (including your RC coordinator), who is well versed with the use of ICT in education. If you already have a faculty who is amongst the top 253 participants in the last FDP, then you may give preference to them for the role of workshop coordinator. The registration process of WSC needs to be completed shortly in order to provide further information about your RC (seating capacity) before 10 July 2017. Registration for the WSC starts from 19 June 2017.

Our vision, endorsed by the chairman of AICTE, is to train around 5,00,000 faculty members of professional institutes through such FDPs. Through this initial effort, we expect some of the trained teachers to become Associate faculty for conduct of future FDPs.

With your kind cooperation and active involvement, we expect the larger vision to be fulfilled in coming years. We look forward to your enthusiastic participation.

Thanks and Regards,  
Workshop Management Team
